Contents

Introduction 7

Part 1 **Adventures**

- 1 Get acquainted with your computer 11
- 2 Digits 15
- 3 Victor Thébault 17
- 4 The 147-generator or the art of being random 20
- 5 An unsolved problem 26
- 6 The arithmetic of King Charles XII of Sweden 29
- 7 A game with four numbers 31
- 8 Permutations 33
- 9 Binomial coefficients 36
- 10 Fibonacci 40
- 11 The greatest common divisor: Nichomachus and Euclid 42
- 12 The triangles of Seseman 45
- 13 Order in chaos, or random patterns 49
- 14 Prime numbers 52
- 15 Andrei Markov 55
- 16 The queens on the chess board 59

Part 2

Commentaries

- 1 Get acquainted with your computer 63
- 2 Digits 76
- 3 Victor Thébault 81
- 4 The 147-generator or the art of being random 93
- 5 An unsolved problem 100
- 6 The arithmetic of King Charles XII of Sweden 106
- 7 A game with four numbers 112
- 8 Permutations 118
- 9 Binomial coefficients 126
- 10 Fibonacci 132
- 11 The greatest common divisor: Nichomachus and Euclid 141
- 12 The triangles of Seseman 149
- 13 Order in chaos, or random patterns 158
- 14 Prime numbers 167
- 15 Andrei Markov 179
- 16 The queens on the chess board 186

Part 3

Answers 191

Bibliography 201

Simple, easy-to-follow activities to help you enjoy and get the most
from your computer

Sixteen chapters of adventures are followed by sixteen commentaries,
which provide solutions and guidance on how to program the
solutions in BASIC.

Progressing through the book you will find that your confidence and
skill improve as you enjoy learning to master your machine.
To aid both the general reader and the student **ADVENTURES WITH
YOUR COMPUTER** avoids being machine-specific or getting involved
in dialects of BASIC, and the programs are usually given in
flow-diagram form, using minimal BASIC.
