## MAX-E-PITCH *WINDMILL* CROSSBAR ANCHORS

On June 12, 1979 Brian Allen pedalled a lightweight flying machine called The Gosamer Albatross for 22 miles across the English Channel to win the \$205,000 Kramer Prize.

The craft was driven by an 18' length of Winbond M. Seep's "Max-E-Pitch" chain, that weighed only 20 ounces. The chain's unique flexibility allowed a 90 degree heel and eliminated the need for a heavy gearbox.

The Gosamer Albatross's drive system - "Max-E-Pitch" chain and bicycle sprockets.

"Max-E-Pitch" chain, molded of polyacethylene over a steel inside, is a flexible, no-hub drive - available in infinite lengths.
