THE LEARNING COMPANY

Since 1980, The Learning Company has consistently produced the highest quality educational software available. Our award-winning products help develop your child's underlying thinking skills and creativity, while reinforcing important areas of the basic curriculum, such as reading, writing, and mathematics.

Every program from The Learning Company undergoes extensive research and testing, with input from education professionals, parents, and children. Each product features a precise balance of educational content and entertainment value. So, your child actually has fun while learning!

How do we do it? Enchanting characters. Challenging situations. Rich game environments. State-of-the-art graphics and sound. Progressive skill levels and game segments that can be customized to meet your child's individual needs.

As parents and educators, we recognize that education is a continuous process. So we developed The Learning System. Carefully sequenced by age groups, this system serves as a product-selection guide—making it easy for you to confidently choose the right products for your children at each stage of their educational development. As an integral part of The Learning System, each of our products addresses a specific age group and subject area with appropriate themes to heighten your child's interest in learning.
