APPENDIX	
I. THIRTY-EIGHT DISHONEST TRICKS	170
II. A DISCUSSION ILLUSTRATING CROOKED THINKING	177

DR ROBERT H. THOULESS was appointed Reader Emeritus in the University of Cambridge in 1961, having been for several years a Reader in Educational Psychology and Fellow of Corpus Christi College. Honorary Fellow, British Psychological Society, he has also been Consultant, NFER, and President, Society of Psychological Research. A distinguished writer on psychological subjects, he was T.B. Davie Memorial Lecturer (Cape Town) 1964, and lectured in Australia during 1962 and 1966.

The ideal of straight thinking must be the application of the scientific habit of thought to all your practical problems. This book deals with those situations in which cold, unemotional thinking is needed, eg. whenever you discuss controversial topics. In addition, this eminent psychologist tells you how to protect yourself from crooked thinking and intellectual exploitation by unscrupulous speakers.

Emotional Meanings

Prejudice

Some Logical Fallacies

Definition and some of its Difficulties

Words and Facts

Habits of Thought

The Value of Straight Thinking

Tricks of Suggestion

Pitfalls in Analogy

Plus Thirty-eight Dishonest Tricks which are commonly used in argument, with the methods of overcoming them.
