 and Pine Floors—Stained Floors—Caring for Varnished
 Floors—Refinishing—Bleaching—Care of Shellacked
 Floors—Care of Wax Floors—Refinishing a Floor—Soft-
 wood Floors—Care of Soft wood Floors—Gravel Floor-
 ings—Baked Linoleum—Old Linoleum—Dining Lin-

AUTHORITATIVE AND PRACTICAL ADVICE

"Whoever owns a house, in city, suburb, town, village, or countryside, or is connected with a house in any sort of supervisory way, will find this practical and excellent volume a handbook of valuable advice and counsel," said the New York Times. Since its first publication, this has been recognized as the standard, authoritative book on how to keep a house in good condition. Its detailed suggestions, sketches and plans are based on Mr. Whitman's answers to more than sixty thousand questions received from home owners writing to his widely syndicated column in the New York Sun. How to remedy creaking floors, what to do about frozen pipes, how to change a washer, how to estimate paint quantity for any size room, how to avoid fuel waste—these are only a few of the questions thoroughly and clearly answered in this book that you won't be able to do without.
