WASHINGTON SQUARE PRESS • NEW YORK

CONTENTS

Note to Reader	v
1. Introduction	1
2. Extracting and Purifying	12
3. Analysis —Discovering What Kind and How Much	24
4. Making New Substances from Old	40
5. “Seeing” Atoms in Molecules	48
6. Building Atoms, Ions , and Molecules into Crystals	58
7. Managing Chemical Reactions	65
8. Describing Chemical Energy	73
9. Specializing in a Product	81
10. Specializing in a Process	91
11. Appreciating Nature’s Chemistry	101
Elements—Their Symbols and Atomic Weights	104
List of Chemicals and Chemical Compounds	106
Glossary	111

CHEMISTRY—one of the oldest of the sciences;
one of the newest of the sciences—without
which there could be no modern world.

This book provides:

- ...a basic explanation of all kinds
of chemistry for those who have
not yet studied it.
- ...an invitation to more advanced
work for those who have studied it.
