A series under the general editorship

VOLTAIRE 

THE AGE OF LOUIS XIV and other selected writings; Newly Translated and Abridged with an Introduction by J. H. Brumfitt

The outspoken, witty view of conventional history
by one of the most unorthodox minds of all time

VOLTAIRE—greatest spokesman of the Age of Enlightenment—author of *CANDIDE*, the biting satire on man's foibles—freethinker and skeptic—is here presented in an incisive anthology of his major historical writings: *THE AGE OF LOUIS XIV*—a vivid portrayal of France's "Sun King" and his vast achievements; *HISTORY OF CHARLES XII*—chapters from the thrilling biography of one of Europe's most courageous but foolhardy kings; *ESSAYS ON CUSTOMS*—witty, shrewd attacks on the bigotry and superstitions that dominated men's minds.

Voltaire lived a turbulent, whirlwind life, frequently arrested and exiled for his defiance of the intolerance and fanaticism of entrenched authority. He was merciless in his contempt of ignorance and relentless in his search for Truth. A great champion of personal freedom, Voltaire swept away the fogs of tradition and "gave wings to the human intelligence."
