PAGE.	PAGE
Introduction. What is Geometry? . . . .	xv

## PART I

### PRACTICAL AND THEORETICAL GEOMETRY

#### CHAPTER I

##### SOLIDS, LINES, POINTS AND SURFACES

1-8. Geometric figures. Solids, lines, points, plane surfaces . . . . .	10
---	----

#### CHAPTER 2

##### ANGLES

9-20. Adjacent, vertically opposite, right, acute, obtuse. Angles formed by rotation. Geometric theorems, converse theorems. Angles at a point . . . . .	26
--	----

#### CHAPTER 3

##### MEASUREMENT OF ANGLES

21-26. The circle. Degrees, protractors, complementary and supplementary angles . . . . .	30
---	----

##### Construction No. 1

##### Exercise 1.

#### CHAPTER 4

##### SIMPLE GEOMETRY OF PLANES

26-30. Planes. Angle between two planes. Vertical and horizontal planes. Angles between a straight line and a plane . . . . .	45
---	----

**THE ENGLISH LANGUAGE BOOK SOCIETY,**  
an association of leading British publishers,  
brings you essential up-to-date textbooks at  
greatly reduced prices.

The Sterling Price of **TEACH YOURSELF  
GEOMETRY** is

£0.60

Inside you will find a list of some other ELBS  
low priced editions. Your local bookseller  
may also be able to show you a complete  
list of ELBS titles.

This is an introduction to the fundamental  
principles of geometry eminently suitable for  
a student who is working privately to use.  
Part I aims at leading the reader to a  
realisation of basic geometric truths by  
appealing to common sense reasoning and  
intuition. The formal proofs are given in  
logical sequence in Part II. No previous  
knowledge of mathematics, beyond ordinary  
arithmetic, is needed by the reader.
